

# freud®

Create beautiful doors, sidelights & transoms!  
Strong joints & unique designs at a fraction of the cost.

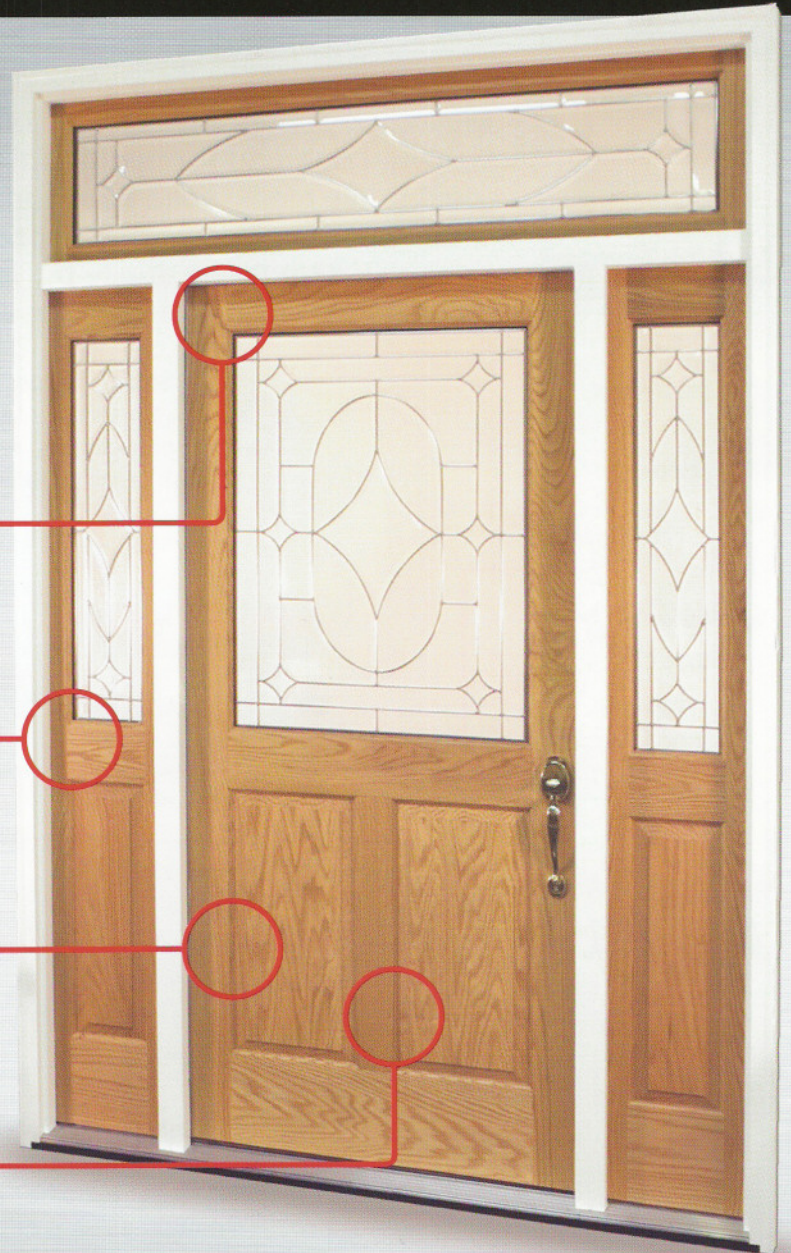

## Introducing Freud's **NEW** Entry & Interior Door Router Bit System

### NEW Freud Innovation (Patent-Pending Design)

Produces extended tenons of virtually any length for extra strong, long lasting joints.

\*Raised Panel Bit not included in all sets.

Thanks to Freud's latest patent-pending innovation, you can create unique wooden doors with the security of durable mortise-and-tenon construction with extended tenons of virtually any length.

Other sets available.

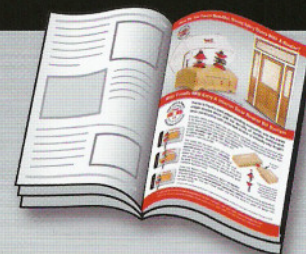

# Entry & Interior Door Router Bit System

**freud**<sup>®</sup>

Item #: 99-267C  
(Counter-Top Case-Cut)  
Contains 4 Sets.

- Entry & Interior Door Opportunity**
- Entry and interior door market = \$14 Billion annually (US).
  - High quality doors are expensive and have limited offerings.
  - Growing demand for design oriented interior doors (decorative glass, solid hardwood, arch top doors etc.)
  - Until now, there has been no good solution to making a door with a router bit due to the inability to create a strong enough joint to support both wood and wood with glass.

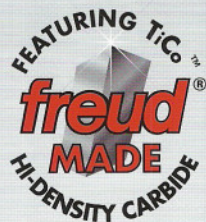

Backed by a Full  
National Ad Campaign

## Shear Angle

Lets the bit slice through the wood, providing a superior finish on all materials.

## Extended Tenons

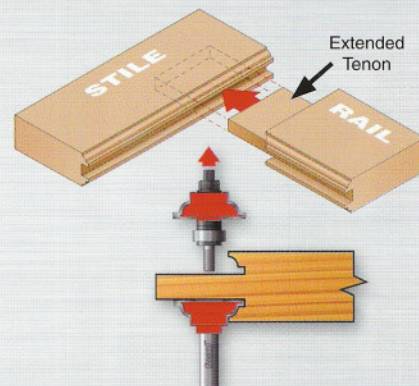

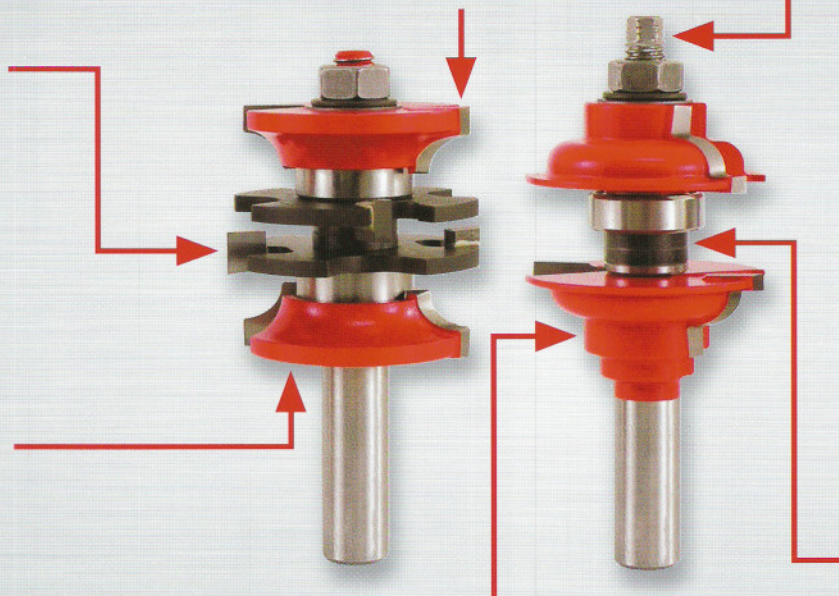

Patent-Pending rail bit comes apart to rout extended tenons for extra-strong mortise and tenon joints!

For Ultimate  
Cutting Life.

Less Working  
Friction for  
Longer Life.

## Removeable Spacers

Comes set up for 1-3/4" exterior door construction. Remove spacers on both bits for 1-3/8" interior door construction.

## Computer Balanced

Designed and manufactured by Freud with extreme precision—to maintain a sharp edge longer.

## Router Bit System Advantages

- Capable of producing tenons of any length—perfect for load bearing joints.
- Each set enables woodworkers to create 1-3/4" thick exterior doors or 1-3/8" thick interior doors, together with sidelites and transoms, in any style or size.
- Both bits include shims for fine-tuning the joints for a perfect fit.
- Includes an instructional mini-DVD and an informative poster.
